

Infinite Ideas

Where there is an idea, there is innovation. Innovation is the key to partnership with clients.

In this age of innovation, idea is what it takes to open the door to the future.

Marubeni Information Systems goes beyond expectations,
offering numerous solutions to satisfy the needs of our clients
by understanding their point of views.

Philosophy

Making 1 from zero with dreams and passion.

At MSYS, ever since our founding,
we have delivered numerous solutions into the market
based on the concept of "1 from zero".

We have believed that our mission is to pursue cutting-edge technologies
and create unrivalled value and services.

Looking ahead to the future, we at MSYS
aim for the "pinnacle of gratitude" by
loving our valued customers, society, employees, and families.

To that end, standing on the global stage,
we will create a future that goes beyond our dreams.

Looking beyond signs, as pioneers, we will play the leading role in change.

MSYS can do that.

Although prospects for Japan's economy are uncertain due to heightened geopolitical risks starting with the situation in Ukraine, rising prices of resources, inflation and so on, ICT investment continues to grow thanks to initiatives for realizing digital reform of business models (digital transformation/DX) in domestic companies. Since the demand for strategic ICT aimed at reinforcing business and securing competitiveness can also be anticipated, we expect steady performance to continue.

In these circumstances, continuing to bring together the technical prowess we have cultivated over the years, we will continue to focus efforts on cloud services, AI and IoT, and leverage various data acquired through our businesses to aim for the creation of further business value. In the area of cloud services, we are providing original application services, expanding our cloud integration business and hybrid cloud operation service, launching new services on our IoT platform, and advancing deployment of business in the digital health field based on data collection and analysis on our cloud platform. Also, for our manufacturing customers, we are focusing efforts on new initiatives such as enhancing manufacturing efficiency based on cyber-physical engineering, creating next-generation digital solutions including work monitoring by image AI, developing the cyber security business for the manufacturing industry, and more.

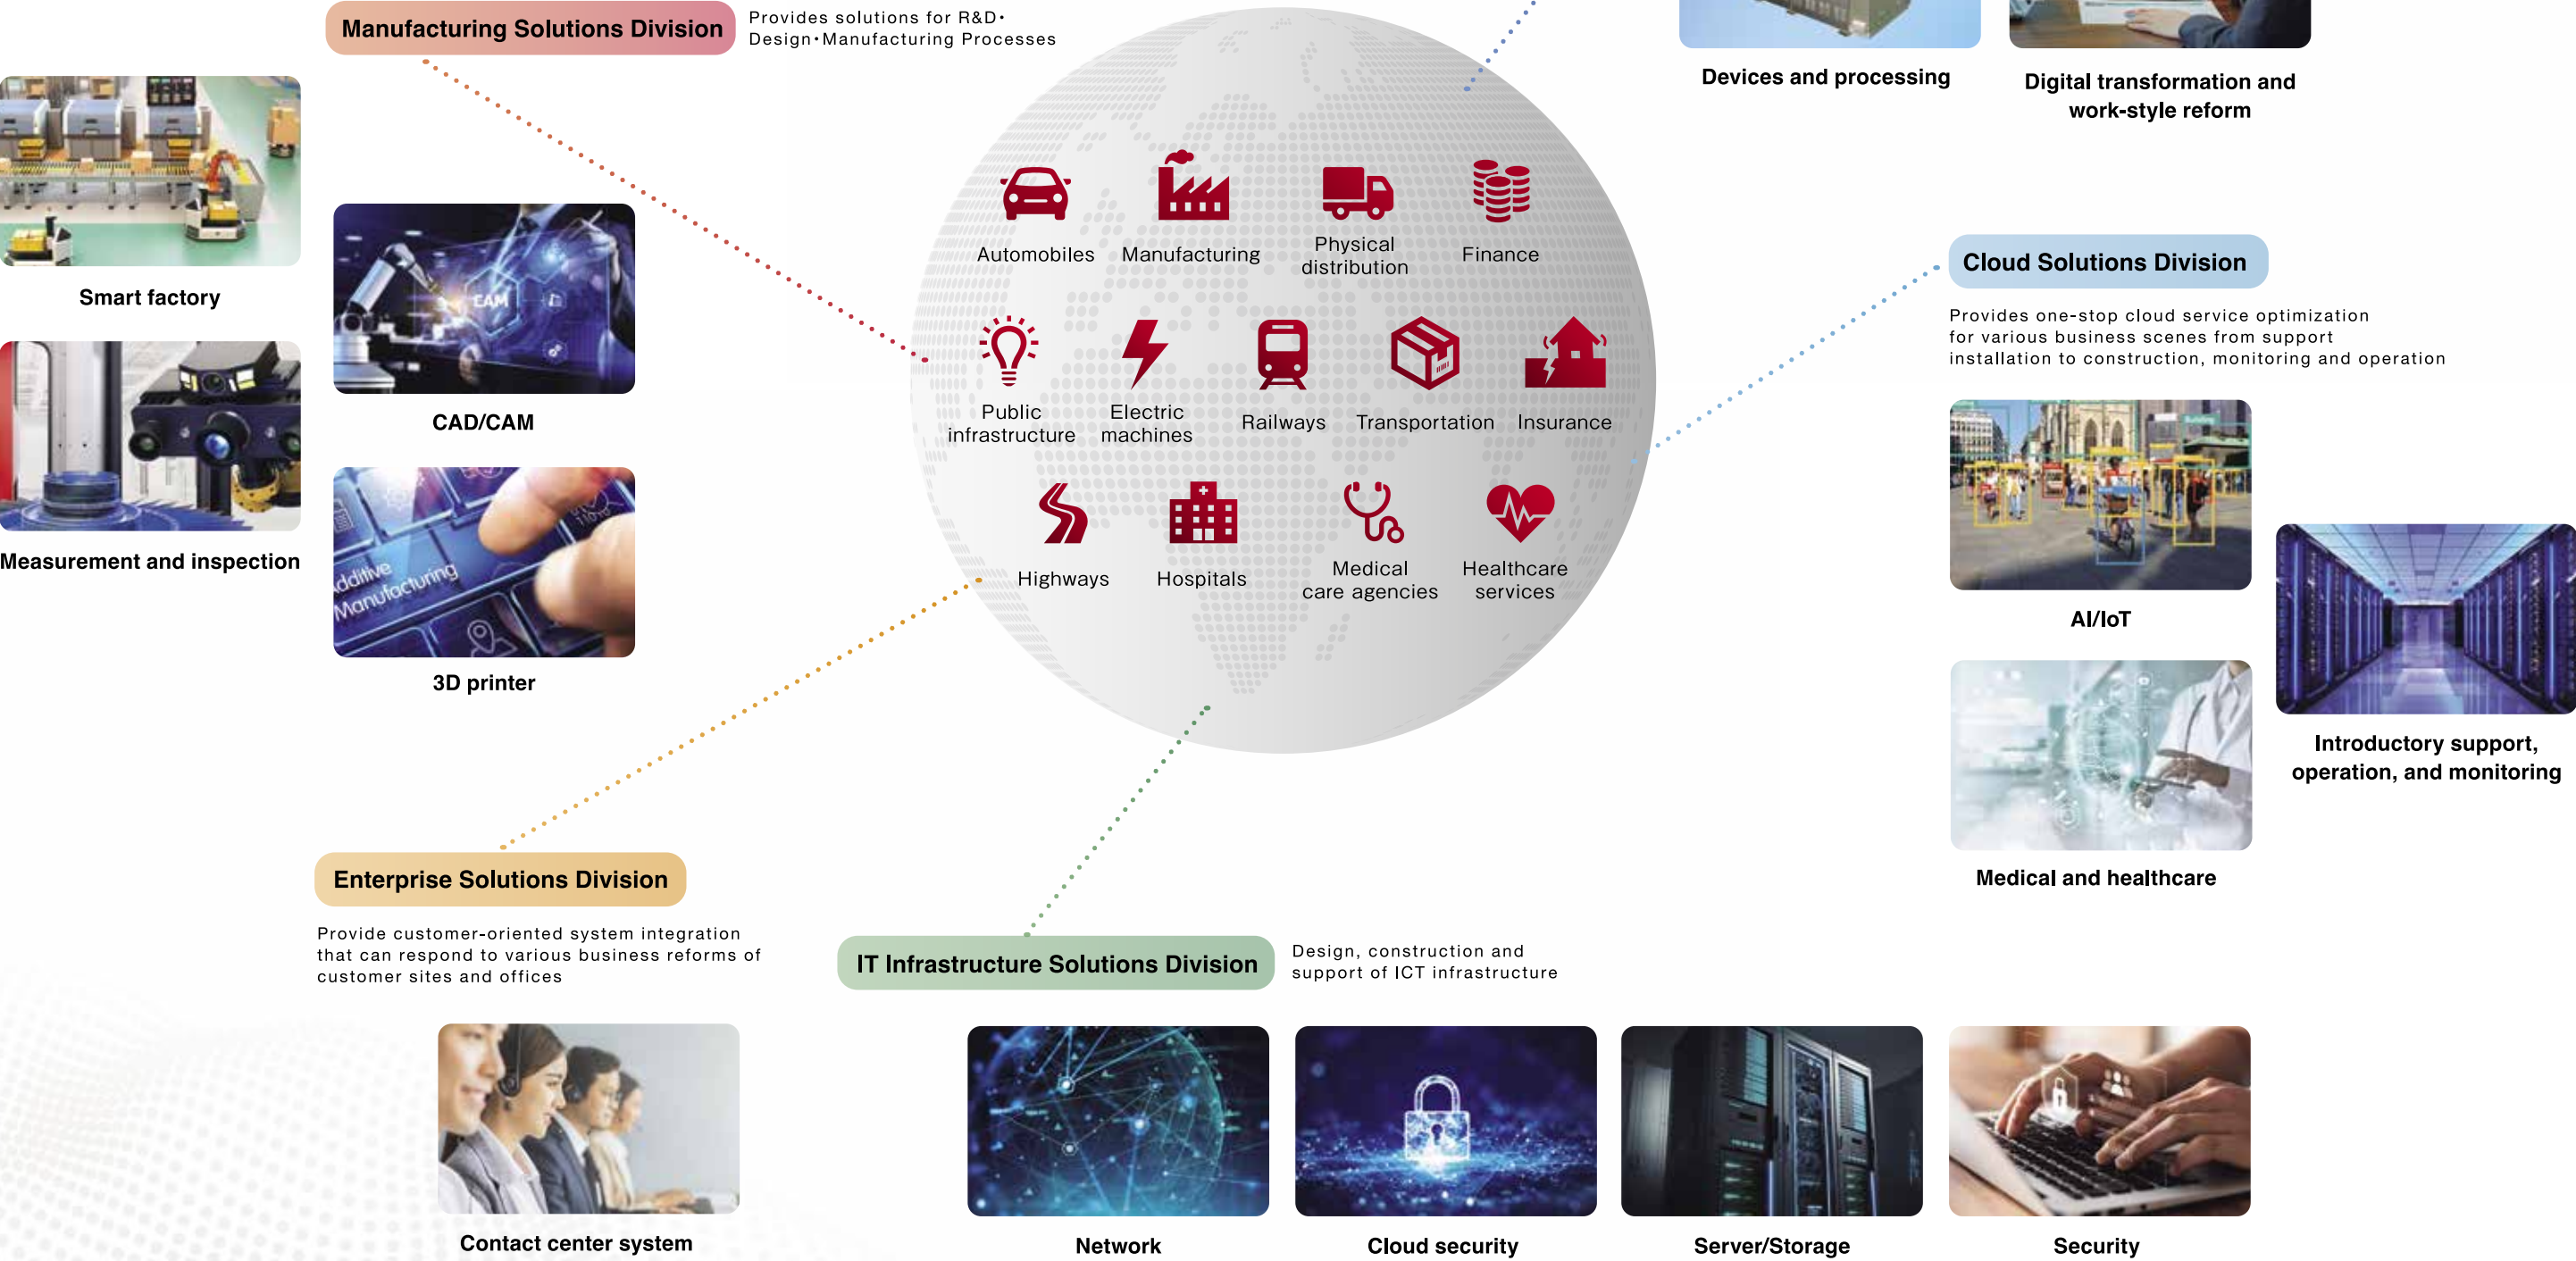

As a partner that can always be trusted by customers, we imbue our corporate concept of "Infinite Ideas" with the unwavering intention to be "a company that creates new business values with limitless ideas". Taking the viewpoint of customers, while looking one step beyond, we will continue striving to become a partner that provides customer satisfaction under the corporate ideal of "Making 1 from zero with dreams and passion".

President & CEO
Ryoichi Watanabe

As a business partner, we propose solutions from the customer's point of view.

With knowledge and advanced proposal capabilities of various industries including manufacturing, logistics, service, retail and finance industry, we provide highly value-added solutions making full use of leading-edge IT.
